

CLAIMANT NAME:

**C. Ronald Lamb
& Judy I. Lamb**

COURT CLAIM NO. 02030

Certificate Number: S4-83052-J

Subbasin: 02 Easton

Source: Nelson Creek

Use: Irrigation of 17 acres

Period of Use: May 1 through October 15

Quantity: 0.34 cubic foot per second; 85 acre-feet per year

Priority Date: **June 30, 1881**

Point of Diversion: 1100 feet north and 250 feet west from the southeast corner of Section 27, being within the SE $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 27, T. 20 N., R. 14 E.W.M.

Place of Use: Lot 21 of Timber Valley III, as per plat thereof recorded in Volume 6 of Plats, pages 52 and 53, Records of Kittitas County and that portion of the SW $\frac{1}{4}$ of Section 26 and the E $\frac{1}{2}$ SE $\frac{1}{4}$ of Section 27, T. 20 N., R. 14 E.W.M., bounded by a line described as follows: Beginning at the southwest corner of said E $\frac{1}{2}$ SE $\frac{1}{4}$ of Section 27, thence N 89°28'04" E, along the south boundary of said E $\frac{1}{2}$ SE $\frac{1}{4}$, 30.50 feet; thence N 0°31'41" W, 1,509.50 feet; thence S 63°43'20" E, 377.96 feet to the true point of beginning; thence S 63°43'20" E, 152.03 feet; thence N 85°28'50" E, 308.20 feet; thence N 47°13'20" E, 105.00 feet; thence N 0°00'00" E, 739.73 feet; thence N 90°00'00" W, 794.09 feet; thence S 2°41'14" E, 437.75 feet; thence S 39°56'54" E, 200.00 feet; thence S 24°33'00" W, 170.91 feet to the true point of beginning.

Limitations Of Use: A maximum of 85 acre-feet per year can be used from Nelson Creek under this right and from Little Creek under the right bearing a priority date of June 30, 1886.

CLAIMANT NAME:

**Pat Deneen
& Nancy Harcus**

COURT CLAIM NO. 01680

Certificate Number: S4-83029-J

Subbasin: 02 Easton

Source: Little Creek

Use: Irrigation of 10 acres and stock water

Period of Use: April 15 through September 30

Quantity: 0.35 cubic foot per second (plus 0.27 cfs for conveyance);
50 acre-feet per year for the irrigation of 10 acres and
0.01 cubic foot per second; 0.50 acre-foot per year for
stock water

Priority Date: **June 30, 1886**

Point of Diversion: 1150 feet north and 1100 feet west from the southeast
corner of Section 28, being within the SE $\frac{1}{4}$ SE $\frac{1}{4}$, Section 28,
T. 20 N., R. 14 E.W.M.

Place of Use: The west 714.12 feet of the W $\frac{1}{2}$ SE $\frac{1}{4}$ of Section 27 T. 20 N.,
R. 14 E.W.M. lying south of the Nelson Siding County Road,
EXCEPT, the south 500 feet thereof, also EXCEPT that
portion which lies north and west of the following
described line: Beginning at a point on the west line of
the said SE $\frac{1}{4}$; which point lies N 1°20'20" W 1108.57 feet
from the southwest corner of said SE $\frac{1}{4}$; thence N 86°40'2" E
55.03 feet; thence N 86°06'57" E 65.19 feet; thence S
82°59' E 18.54 feet; thence N 78°23'55" E 75.50 feet;
thence N 75°00'15" E 76.98 feet; thence N 16°21'02" E
618.15 feet to the terminus on the right of way for the
said county road.

CLAIMANT NAME: **Earl E. Gentry
& Valerie K. Gentry
Daniel B. Crowe
& Donna L. Crowe** COURT CLAIM NO. 00755

Certificate Number: S4-83020-J

Subbasin: 02 Easton

Source: Big Creek

Use: Irrigation of 78.49 acres and stock water

Period of Use: May 1 through September 1 for irrigation; continuous for stock water

Quantity: 1.67 cubic feet per second; 376.8 acre-feet per year for irrigation and 1.36 cubic feet per second from September 2 through November 15, 1.94 cubic feet per second from November 16 through February 29, 1.37 cubic feet per second from March 1 through April 30, 0.25 cubic foot per second from May 1 through September 1; 7.88 acre-feet per year for consumptive stock water

Priority Date: **June 30, 1887**

Point of Diversion: 1100 feet north and 750 feet east from the south quarter corner of Section 29, being within the SW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 29, T. 20 N., R. 14 E.W.M.

Place of Use: That part of the W $\frac{1}{2}$ E $\frac{1}{2}$ of Section 28 lying north of the Kittitas Reclamation District Canal, the NE $\frac{1}{4}$ NW $\frac{1}{4}$, and NE $\frac{1}{4}$ SE $\frac{1}{4}$ NW $\frac{1}{4}$ of Section 28, ALL within T. 20 N., R. 14 E.W.M.

Limitations Of Use: The instantaneous quantity authorized for stock watering from May 1 through September 1 is not in addition to that authorized for irrigation during that same period. When there is a surplus of water in the creek and all of the rights to the creek are being fully satisfied, up to 6.0 cubic feet per second and an additional 166 acre-feet per year can be diverted under this right.

Comments: This water right reflects changes approved pursuant to Water Right Change Application Nos. CS4-YRB02CC00755@2 and CS4-00755 (A) CTCL.

Lois Kathy Juris
Kathleen L. Agostinelli
Jana Snyder, et vir**

COURT CLAIM NO. 00353

Certificate Number: S4-83027-J

Subbasin: 02 Easton

Source: Big Creek

Use: Irrigation of 80 acres and stock water

Period of Use: May 1 through September 1 for irrigation; continuous for stock water

Quantity: 1.6 cubic feet per second; 384 acre-feet per year for irrigation, 8.84 acre-feet per year for stock watering and 0.25 cubic foot per second from May 1 through September 1, 0.767 cubic foot per second from September 2 through November 15, 1.09 cubic feet per second from November 16 through February 29, 0.767 cubic foot per second from March 1 through April 30 for consumptive stock watering

Priority Date: **June 30, 1887**

Point of Diversion: 1100 feet north and 750 feet east from the south quarter corner of Section 29, being within the SW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 29, T. 20 N., R. 14 E.W.M.

Place of Use: Those portions of the S $\frac{1}{2}$ NW $\frac{1}{4}$ and NE $\frac{1}{4}$ SW $\frac{1}{4}$ Section 28, T. 20 N., R. 14 E.W.M. lying north of the Kittitas Reclamation District Canal; EXCEPT the NE $\frac{1}{4}$ SE $\frac{1}{4}$ NW $\frac{1}{4}$ and EXCEPT those portions of the SE $\frac{1}{4}$ SW $\frac{1}{4}$ NW $\frac{1}{4}$ and the NE $\frac{1}{4}$ NW $\frac{1}{4}$ SW $\frac{1}{4}$ lying southeast of the private road connecting the canal bridge crossing and the Nelson Siding Road.

Limitations Of Use: The instantaneous quantity authorized for stock watering from May 1 through September 1 is not in addition to that authorized for irrigation. When there is a surplus of water in the creek and all existing rights are being satisfied, up to 3.2 cubic feet per second and an additional 95 acre-feet per year can be diverted, provided that no more than 6.8 cfs is diverted into the Lund Ditch by all of the Big Creek Water Users on the ditch.

CLAIMANT NAME: **David L. Lund
& Marilyn E. Lund**

COURT CLAIM NO. 00456

Certificate Number: S4-83026-J

Subbasin: 02 Easton

Source: Big Creek

Use: Irrigation of 8 acres and stock water

Period of Use: May 1 through September 1 for irrigation; continuous for stock water

Quantity: 0.16 cubic foot per second; 38.4 acre-feet per year for irrigation and 0.90 acre-foot per year for stock water, 0.01 cubic foot per second from May 1 through September 1, 0.078 cubic foot per second from September 2 through November 15, 0.111 cubic foot per second from November 16 through February 29, 0.078 cubic foot per second from March 1 through April 30 for consumptive stock water

Priority Date: **June 30, 1887**

Point of Diversion: 1100 feet north and 750 feet east from the south quarter corner of Section 29, being within the SW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 29, T. 20 N., R. 14 E.W.M.

Place of Use: Those portions of the SE $\frac{1}{4}$ SW $\frac{1}{4}$ NW $\frac{1}{4}$ and the NE $\frac{1}{4}$ NW $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 28, T. 20 N., R. 14 E.W.M. lying north of the Kittitas Reclamation District Canal and southeast of the private road connecting the Kittitas Reclamation District bridge crossing with the Nelson Siding Road.

Limitations Of Use: When there is a surplus of water in the creek and all existing rights are being satisfied, up to 0.32 cfs and an additional 19 acre-feet per year may be diverted, provided no more than 6.8 cfs is being diverted into the Lund Ditch by the Big Creek Water Users. The instantaneous quantity authorized for stock water from May 1 to September 1 is not in addition to that authorized for irrigation.

CLAIMANT NAME: **New Suncadia, LLC**

COURT CLAIM NO. 00755

Certificate Number: S4-85208-J

Subbasin: 02 Easton

Source: Big Creek

Use: Instream Flow

Period of Use: May 1 through September 1

Quantity: Primary Reach - 248.85 acre-feet per year distributed as follows:
May - 1.02 cubic-foot per second (cfs) and 62.72 acre-feet;
June - 1.02 cfs and 60.69 acre-feet; July - 1.02 cfs and 62.72 acre-feet; August - 1.02 cfs and 62.72 acre-feet

Secondary Reach - 84.81 acre-feet per year distributed as follows:
May - 0.27 cfs and 16.31 acre-feet; June - 0.32 cfs and 18.87 acre-feet; July - 0.42 cfs and 25.55 acre-feet; August - 0.39 and 24.08 acre-feet

Up to 82.58 acre-feet per year for mitigation for potential net increase in consumptive use by New Suncadia LLC from the Yakima River or cumulative impacts of the project.

Priority Date: **June 30, 1887**

Point of Diversion: N/A

Place of Use: Beginning at the original point of diversion located 1100 feet north and 750 feet east from the south quarter corner of Section 29, being within the SW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 29, T. 20 N., R. 14 E.W.M., and continuing downstream in Big Creek and the Yakima River.

Limitations Of Use: The 82.58 acre-feet per year of water for mitigation associated with this water right will only be available when water is available at the old point of diversion. This annual quantity of trust water available may be used to mitigate increased consumptive use associated with the New Suncadia LLC or other cumulative impacts of the project.

An ongoing monitoring program shall be established to ensure that the amount of water used at New Suncadia LLC and the City of Cle Elum is consistent with the water available under the water rights that have been acquired by New Suncadia LLC and that the collective operations described in the water supply plan for New Suncadia LLC and Cle Elum Urban Growth Area are protective of the water rights of other water users on the mainstem of the Yakima River and its tributary streams.

New Suncadia LLC shall submit a Monitoring Plan describing the hydrologic monitoring program, subject to review and approval by Ecology.

A stream gauging system shall be installed on Big Creek to acquire water surface stage (elevation) data to be correlated to flow (in cubic-feet per second). The stream gage shall be located downstream of the Lund-Darling Diversion Dam and upstream of the Big Creek-Kittitas Reclamation District Siphon.

The stream gage shall be an approved measuring device, and be constructed and maintained as described in the approved Monitoring Plan.

Hydrologic conditions on Big Creek shall be recorded continuously and reported on at least a daily average flow basis.

The hydrologic monitoring by New Suncadia LLC will be incorporated into the United States Bureau of Reclamation's monitoring network, either directly or through Ecology.

The data collected with the Big Creek stream gage shall be incorporated into a monitoring program that encompasses measurement and reporting for First Creek, Swauk Creek and the Teanaway River, and for the New Suncadia LLC/Cle Elum diversions on the Yakima and Cle Elum Rivers.

New Suncadia LLC shall submit a water management plan for Ecology's approval that describes how water will be managed when water under this authorization is not available at the original point of diversion. The plan must be approved by Ecology before trust water is available to mitigate consumptive use impacts associated with the project.

New Suncadia LLC shall enter into a Trust Water Right Agreement with Ecology to convey its rights under this authorization to the State and to identify reasonable conditions.

The annual amount of trust water transfers (Qa) available to mitigate for the mainstem water right transfers associated with the New Suncadia LLC development does not include assumed future water use on property appurtenant to the water right. The annual amount of trust water available for mitigation of New Suncadia LLC development will be less 0.556 acre-feet per year per Equivalent Residential Unit developed on appurtenant property (up to a total of 2.23 acre-feet per year). Thus the annual amount of trust water available for mitigation in the secondary reach will be 82.58 acre-feet per year. Future landowners on property appurtenant to the New Suncadia LLC water right have two options for use of the 2.23 acre-feet per year described above: 1) leave water in trust as mitigation for exempt domestic use in accordance with the Trust Water Right Agreement between New Suncadia LLC and Ecology, or 2)

apply for a water right change from a trust water right to the domestic and irrigation use that would occur on the appurtenant property.

This authorization shall in no way excuse the permittee from compliance with any applicable federal, state, or local statutes, ordinances, or regulations including those administered by other programs of the Department of Ecology.

Comments:

This water right reflects changes approved pursuant to Water Right Change Application Nos. CS4-YRB02CC00755@2 and CS4-00755 (A) CTCL.

CLAIMANT NAME:

New Suncadia, LLC
WA State Department of Ecology

COURT CLAIM NO. 00176

Certificate Number:

S4-83019-J

Subbasin:

02 Easton

Source:

Big Creek

Use:

Instream flow and mitigation

Period of Use:

Continuous

Quantity:

Primary Reach - 2.4067 acre-feet per year, to be distributed as follows:

0.00001 cfs, 0.000558 acre-foot per month in the non-irrigation season (September 2 through April 30); 0.00001 cfs, 0.000558 acre-foot in May; 0.00930 cfs, 0.552558 acre-foot in June; 0.01721 cfs, 1.056558 acre-feet in July; 0.01252 cfs, 0.768558 acre-foot in August; 0.00041 cfs, 0.024558 acre-foot on September 1st

Secondary Reach - 0.8767 acre-foot per year, to be distributed as follows:

0.00001 cfs, 0.000558 acre-foot per month in the non-irrigation season (September 2 through April 30); 0.00001 cfs, 0.000558 acre-foot in May; 0.00337 cfs, 0.200660 acre-foot in June; 0.00624 cfs, 0.383360 acre-foot in July; 0.00454 cfs, 0.278960 acre-foot in August; 0.00044 cfs, 0.008700 acre-foot on September 1st

Priority Date:

June 30, 1887

Point of Diversion:

N/A

Place of Use:

Primary Reach - The portion of Big Creek from the original point of diversion to the confluence with the Yakima River

Secondary Reach - Commencing at the confluence of Big Creek and the Yakima River, within the Yakima River downstream to the confluence with the Columbia River

Limitations Of Use:

With the purpose of use of the water being changed from irrigation and stock watering to instream flows, no portion of Mr. King's water right may be diverted from the historic point of diversion. Future use of the instream flow right will be controlled through a trust water right agreement with the Department of Ecology.

Under the Kittitas County Water Conservancy Board's consumptive use estimate, above, in order to avoid an increase in consumptive use and a decrease to TWSA, Parcel

957094 shall be fallowed. Water can only be used on Parcel 957094 if mitigated from another source or trust water right and authorized by the Department of Ecology.

Comments:

This water right reflects changes approved pursuant to Water Right Change Application No. CS4-00176sb2.

Priority Date: **June 30, 1887**

Point of Diversion: N/A

Place of Use: Primary Reach: Beginning at a point located 1100 feet
north and 750 feet east of the south quarter corner of
Section 29, being within the SW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 29, T. 20
N., R. 14 E.W.M. and ends at a point 790 feet south and
1700 feet west of the northeast quarter corner of Section
21, T. 20 N., R. 14 E.W.M.

Secondary Reach: Beginning at a point located 790 feet
south and 1700 feet west of the northeast quarter corner of
Section 21, T. 20 N., R. 14 E.W.M., and continues down the
Yakima River to the confluence with the Columbia River.

Comments: This water right reflects changes approved pursuant to
Water Right Change Application No. CS4-00176sb2@13.

CLAIMANT NAME: **New Suncadia, LLC**

COURT CLAIM NO. 00755

Certificate Number: S4-85207-J

Subbasin: 02 Easton

Source: Big Creek

Use: Instream Flow

Period of Use: May 1 through September 1

Quantity: Primary Reach - 124.42 acre-feet per year distributed as follows:
May - 0.51 cubic-foot per second (cfs) and 31.36 acre-feet;
June - 0.51 cfs and 30.34 acre-feet; July - 0.51 cfs and 31.36 acre-feet; August - 0.51 cfs and 31.36 acre-feet

Secondary Reach - 42.41 acre-feet per year distributed as follows:
May - 0.13 cfs and 8.15 acre-feet; June - 0.16 cfs and 9.45 acre-feet; July - 0.21 cfs and 12.77 acre-feet; August - 0.20 and 12.04 acre-feet

Up to 41.30 acre-feet per year mitigation for potential net increase in consumptive use by the New Suncadia LLC Urban Growth Area development from the Yakima River.

Priority Date: **June 30, 1887**

Point of Diversion: N/A

Place of Use: Beginning at the original point of diversion located 1100 feet north and 750 feet east from the south quarter corner of Section 29, being within the SW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 29, T. 20 N., R. 14 E.W.M., and continuing downstream in Big Creek and the Yakima River.

Limitations Of Use: The 41.30 acre-feet per year of water for mitigation associated with this water right will only be available when water is available at the old point of diversion. This annual quantity of trust water available may be used to mitigate increased consumptive use associated with the New Suncadia LLC Urban Growth Area development or other cumulative impacts of the project.

An ongoing monitoring program shall be established to ensure that the amount of water used at New Suncadia LLC and the City of Cle Elum is consistent with the water available under the water rights that have been acquired by New Suncadia LLC and that the collective operations described in the water supply plan for New Suncadia LLC and Cle Elum Urban Growth Area are protective of the water rights of other water users on the mainstem of the Yakima River and its tributary streams.

New Suncadia LLC shall submit a Monitoring Plan describing the hydrologic monitoring program, subject to review and approval by Ecology.

A stream gauging system shall be installed on Big Creek to acquire water surface stage (elevation) data to be correlated to flow (in cubic-feet per second). The stream gage shall be located downstream of the Lund-Darling Diversion Dam and upstream of the Big Creek-Kittitas Reclamation District Siphon.

The stream gage shall be an approved measuring device, and be constructed and maintained as described in the approved Monitoring Plan.

Hydrologic conditions on Big Creek shall be recorded continuously and reported on at least a daily average flow basis.

The hydrologic monitoring by New Suncadia LLC will be incorporated into the United States Bureau of Reclamation's monitoring network, either directly or through Ecology.

The data collected with the Big Creek stream gage shall be incorporated into a monitoring program that encompasses measurement and reporting for First Creek, Swauk Creek and the Teanaway River, and for the New Suncadia LLC/Cle Elum diversions on the Yakima and Cle Elum Rivers.

New Suncadia LLC shall submit a water management plan for Ecology's approval that describes how water will be managed when water under this authorization is not available at the original point of diversion. The plan must be approved by Ecology before trust water is available to mitigate consumptive use impacts associated with the project.

New Suncadia LLC shall enter into a Trust Water Right Agreement with Ecology to convey its rights under this authorization to the State and to identify reasonable conditions.

The annual amount of trust water transfers (Qa) available to mitigate for the mainstem water right transfers associated with the New Suncadia LLC Urban Growth Area development does not include assumed future water use on property appurtenant to the water right. The annual amount of trust water available for mitigation of New Suncadia LLC development will be less 0.278 acre-feet per year per Equivalent Residential Unit developed on appurtenant property (up to a total of 1.11 acre-feet per year). Thus the annual amount of trust water available for mitigation in the secondary reach will be 41.30 acre-feet per year. Future landowners on property appurtenant to the New Suncadia LLC water right have two options for use of the 1.11 acre-feet per year described above: 1) leave water in trust as mitigation for exempt domestic use in accordance with the Trust Water Right Agreement between New Suncadia

LLC and Ecology, or 2) apply for a water right change from a trust water right to the domestic and irrigation use that would occur on the appurtenant property.

This authorization shall in no way excuse the permittee from compliance with any applicable federal, state, or local statutes, ordinances, or regulations including those administered by other programs of the Department of Ecology.

Comments:

This water right reflects changes approved pursuant to Water Right Change Application Nos. CS4-YRB02CC00755@2 and CS4-00755 (A) CTCL.
